New console project Hello World *2*

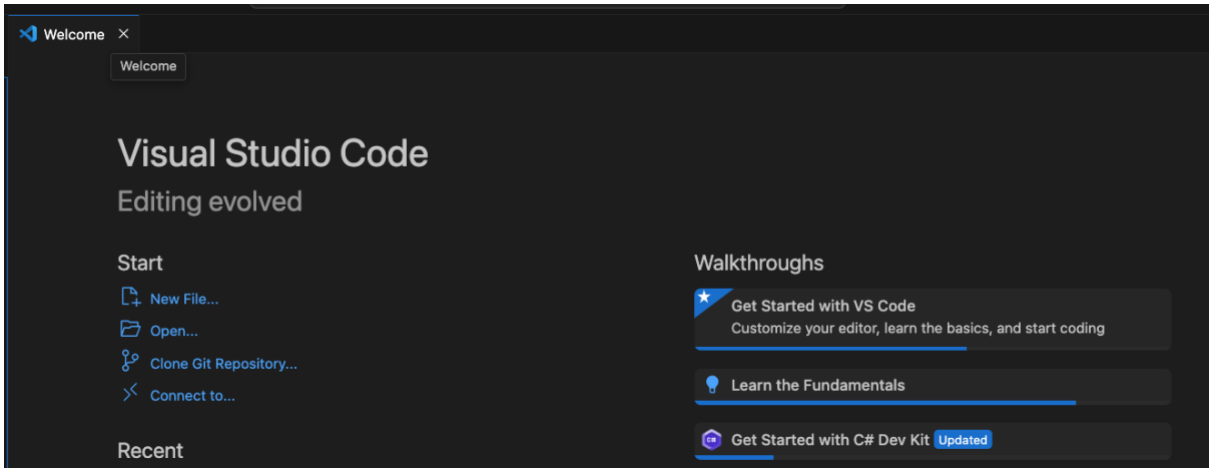

New web project Hello World *4*

Demo: Hello World

Author: Baifan Zhou

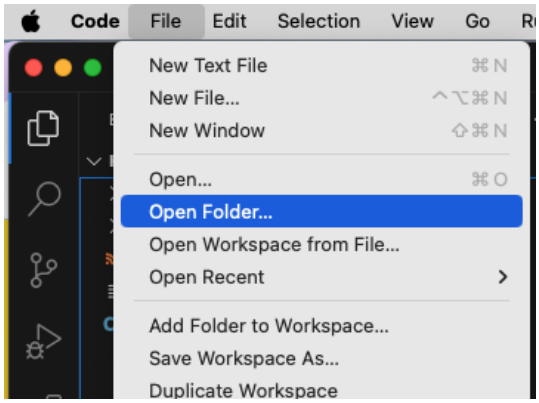

New console project Hello World

Open VS Code, you will see the following welcome page.

You can click Get Started with VS Code to explore VS code a bit, if you have not used VS Code before.

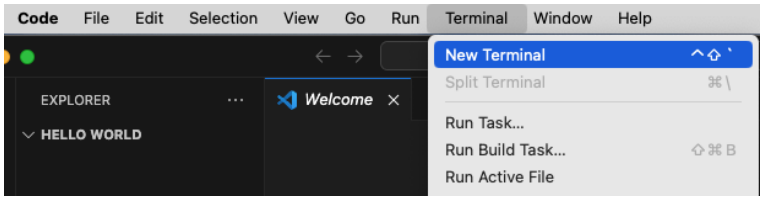

Open a folder by clicking `Open...`, or click the File menu and select `Open Folder...`

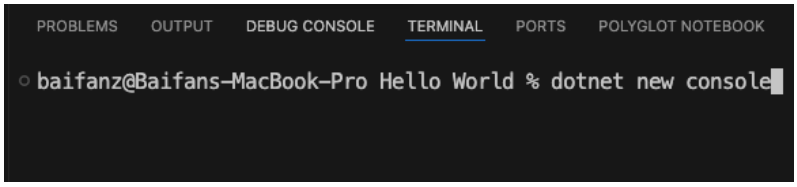

Select a folder for your Hello World project. You can create a folder called “Hello World”

Note: You can open both folder and file in Mac with `Open...`, but in Windows you only have `Open File...` for files. In both Windows and Mac, `Open Folder...` is always for open folders.

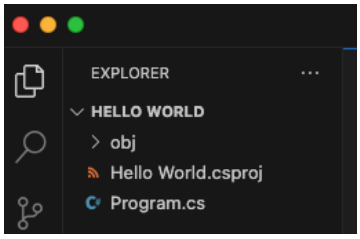

Start the Terminal by clicking the Terminal in the menu bar (Mac and Windows are similar) or use some shortcut.

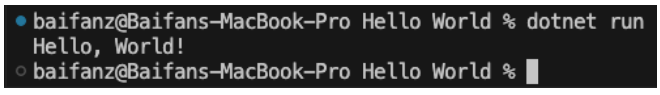

In the Terminal, run the command: dotnet new console

Some files will be generated in the Explorer of VS Code

In the terminal, type: dotnet run. The Hello World is output to the Terminal.

In the Program.cs, you will see the code that brings about the effect.

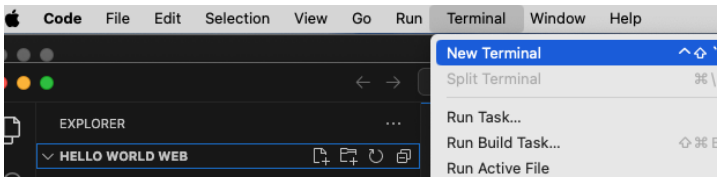

New web project Hello World

Open a folder by clicking `Open...`, or click the File menu and select `Open Folder...`

Create a new folder named Hello World Web.

Open the terminal and run command

```
dotnet new web
```

```
[USER]:Hello World Web % dotnet new web
The template "ASP.NET Core Empty" was created successfully.

Processing post-creation actions...
Restoring /Users/bazho0342/Code/baifan-ai-projects/ITPE3200-26H/Introduction/Hello World Web/Hello W
orld Web.csproj:
Restore succeeded.
```

The syntax to create new dotnet projects is

```
dotnet new [template name] -n [name of the new project]
```

To have an overview of all possible templates, see https://learn.microsoft.com/en-us/dotnet/core/tools/dotnet-new

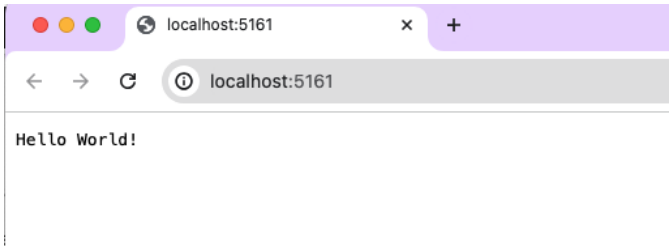

Run the project by run the following code in the terminal

```
dotnet run
```

Then go to the URL displayed in the terminal

```
baifanz@Baifans-MacBook-Pro Hello World Web % dotnet run
Building...
info: Microsoft.Hosting.Lifetime[14]
      Now listening on: http://localhost:5161
info: Microsoft.Hosting.Lifetime[0]
      Application started. Press Ctrl+C to shut down.
info: Microsoft.Hosting.Lifetime[0]
      Hosting environment: Development
info: Microsoft.Hosting.Lifetime[0]
      Content root path: /Users/baifanz/ProgrammingProjects/2024ITPE3200Programming/Hello World Web
```

You will see an empty web page with Hello World!

Now shutting down the application by selecting the terminal and press Ctrl/Command + C.

```
baifanz@Baifans-MacBook-Pro Hello World Web % dotnet run
Building...
info: Microsoft.Hosting.Lifetime[14]
      Now listening on: http://localhost:5161
info: Microsoft.Hosting.Lifetime[0]
      Application started. Press Ctrl+C to shut down.
info: Microsoft.Hosting.Lifetime[0]
      Hosting environment: Development
info: Microsoft.Hosting.Lifetime[0]
      Content root path: /Users/baifanz/ProgrammingProjects/2024ITPE3200Programming/Hello World Web
^Cinfo: Microsoft.Hosting.Lifetime[0]
      Application is shutting down...
baifanz@Baifans-MacBook-Pro Hello World Web %
```

Congratulations! You now have finished your Hello World project! ☺
